

PRANAV RAMANE

UNDERGRADUATE STUDENT

Email: pranavram2520@gmail.com | LinkedIn: www.linkedin.com/in/pranav-ramane
Languages Known : English, Hindi & Marathi | Address: Chinchwad, Pune, IN 411033

TECHNICAL SKILLS

- Python libraries** : Numpy, Pandas, Turtle, Matplotlib, seaborn, scikit-learn, PyTorch, Tensorflow.
- Databases** : MySQL, MongoDB, PostgreSQL
- Data Visualization** : Tableau, PowerBI
- Data Analysis & Statistics**: EDA , Hypothesis Testing, A/B Testing
- Machine Learning**: Supervised & Unsupervised Learning - Regression, Classification, Clustering, Anomaly Detection (Isolation Forest, LOF, COPOD), Model Evaluation (Precision, Recall, F1-score)
- Tools & Platforms**: Excel, Git, GitHub, Apache Hadoop & Spark (for Big Data Analysis)

EDUCATION

10th Standard (SSC) - 93.40% Vidya Niketan English Medium School, Pimpri, Pune-411018

12th Standard (HSC) - 77.83% (MHT-CET: 96.12) Dr. D.Y. Patil Junior College, Nigdi, Pune-411044

Bachelor of Computer Engineering - 9.43 CGPA (Aggregate)

Pimpri Chinchwad College of Engineering & Research, Ravet, Pune

INTERNSHIPS & CERTIFICATIONS

AI-ML Virtual Internship | EduSkills (AICTE, Google for Developers). Jan 2026 - Mar 2026

Developed hands-on experience applying machine learning techniques, focusing on object detection and image pattern recognition

Database Programming with SQL - Oracle Academy

Nov 2025

Completed coursework covering SQL queries, joins, subqueries, and database design fundamentals

Checkout all of my Certifications (Google Drive link): <https://tinyurl.com/shymw69u>

PROJECTS

Anomaly Detection during Stamping Process (Using Unsupervised & Time Series dataset)

- Designed an unsupervised anomaly detection system for industrial stamping processes using Isolation Forest and Autoencoders, flagging defective samples with ~90% accuracy, enabling early fault detection before production failure

T20 World Cup Data Analytics (End-to-End)

- Built an end-to-end analytics pipeline processing 500+ player records from ESPNcricinfo, applying Star Schema modeling and DAX in Power BI to automate Best-XI selection, reducing manual evaluation effort by ~80% based on KPIs like strike rate and bowling economy

Automated Crater Detection

- Built an automated crater detection system on lunar surface imagery using YOLOv8 (object detection) and U-Net (segmentation). Preprocessed and analyzed large-scale image datasets using Pandas and NumPy Enhanced detection performance by integrating detection and segmentation pipelines for precise crater localization

For More Projects checkout my Github Account : <https://github.com/Darkwizard-Pranav>

ACHIEVEMENTS

3rd Position in Craftverse Hackathon

October 2025

Secured 3rd position in the Craftverse Hackathon (2025) with the project 'Vulnera : A bug bounty platform'.

Qualified for third round : Reimagined Hackathon (All India)

August 2024

Qualified for the third round (Semifinals) of the Reimagined Hackathon by Sheryians Coding School.
